- ▶ Intermass Building Construction
- ▶ Sheikh Hamdan Bin Rashid Awards

Structured cabling

A structured cabling system is a complete system of cabling and associated hardware, which provides a comprehensive telecommunications infrastructure. This infrastructure serves a wide range of uses, such as to provide telephone service or transmit data through a computer network and It should not be device dependent.

The structured cabling system begins at the point where the service provider (SP) terminates. This point is the point of demarcation (DEMARC) or Network Interface Device (NID).

For example, in a telephone system installation, the SP furnishes one or more service lines (per customer requirements). The SP connects the service lines at the point of demarcation.

Every structured cabling system is unique. This is due to variations in:

- The cable and connection products.
- The function of the cabling installation.
- Customer requirements and Manufacturer warranties.
- The configuration of an already installed system (upgrades and retrofits).
- The types of equipment the cabling installation will support present and future.
- The architectural structure of the building, which houses the cabling installation.

The benefits of these standards include:

- Consistency of design and installation
- Conformance to physical and transmission line requirements.
- A basis for examining a proposed system expansion and other changes.

PABX A PBX

system that connects telephone extensions to the Public Switched Telephone Network or Telephone line providers and allow internal communication for a business.

An IP PBX work with network connectivity and provide communication by utilizing the TCP/IP network protocol stack In business phone system, a PBX acts as the central switching system for phone calls within a business.

The use of PBX was to provide shared access to limited resources, such as a business having 2,5 ,10 or more lines from service provider and the number of users in that organization is greater than the number of lines.

In that case a PBX [IP PBX / PABX SYSTEM] share the line to all the users. Instead of providing separate line for all the users it will allow the users to share a small pool of lines.

OUR MAIN BRANDS ARE:

- ▶ CISCO
- ▶ AVAYA
- ▶ YEASTAR
- ▶ PANASONIC

Security Systems, CCTV & IP Camera

ArcNet is one of suppliers and integrators of security cameras, video surveillance systems, and CCTV equipment (Closed Circuit Television) for home, business and government.

Surveillance cameras, DVR and NVR systems with remote Internet viewing is our specialty. Most of our surveillance systems include DVR and NVR viewer software for Windows and Mac PCs, as well as mobile surveillance viewer apps for iPhone, iPad, and Android devices.

We sell many complete systems that are pre-configured and easy to install.

ArcNet provides the best customer service & technical support in the industry.

We also strive to provide the most competitive pricing possible on surveillance systems, security cameras.

Time Attendance and Biometric Systems

ArcNet makes easy work of the tedious tasks involved with monitoring employee time and attendance.

Our simplified time-tracking software/hardware and data collection devices helps you to control labor costs by enforcing pay and work rules consistently and accurately across the organization minimize compliance risk and improve workforce productivity ... without breaking a sweat and that reduces the administrative time associated with attendance exceptions and employee inquiries all while minimizing overpayments and compliance risk.

Labor-intensive timecard tracking, data entry, and approval processing are simplified using the software and services we provide.

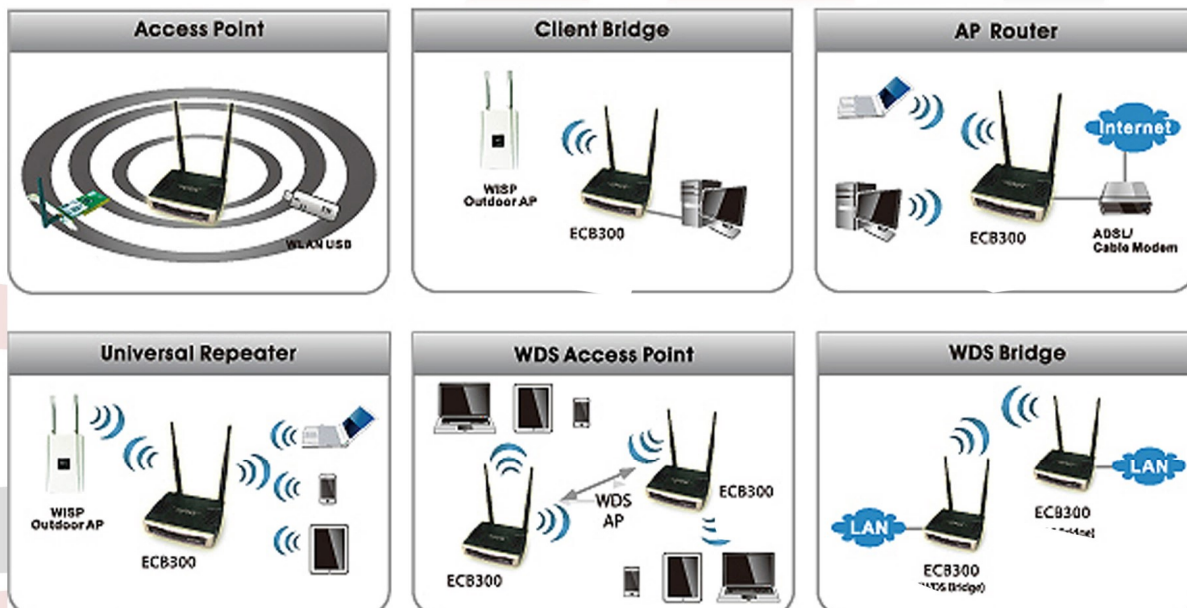

Radio and wifi

ArcNet offers a complete range of Wireless solutions for Point-to-point and Point-to-Multi-point Wireless connectivity and further related.

We offer Broadband OFDM Radios, Carrier-Class Free Space Optics (FSO), Millimeter Wave, WiFi Hotspots, License Excepted RF, Licensed Microwave, WiMax plus complete solutions for Wireless Area Networks and beyond. We are supplier and installer of major brands such as Engenius, Inscapedata, Ubiquiti, Mikrotik, ...

Some completed projects:

- ▶ **Sheikh Hamdan bin Rashid Awards office**
Description: Telephone system and Wired and wireless networking.
- ▶ **Dubai Metro Wifi and GPRS Cabling and antenna Installation**
Description: Cabling and antenna installation for 5 Metro Station partner with DXB Telecom solutions.
- ▶ **Hilton Hotel at JBR Dubai**
Description: New beach Restaurant security system connected to main control room.
- ▶ **Ajman Ewan Hotel**
Description: G+3P+14 with 108 rooms full installation of Cat6 cabling System, Telephone system, Networking for offices, wireless system and annual maintenance contracting.
- ▶ **Bin Ham TOWERS G+7P+25 IN SHARJAH AL NAHDAH AREA**
Description: 4 typical G+7P+25 residential towers fiber to the home and CAT6 structured cabling.
- ▶ **Juelmin Insurance services**
Description: full structured Cabling, installation of Telephone System, Time attendance, Wireless system Call Recording system, Call billing system, Avaya Call Center installation, ...
- ▶ **Al Mumayaz Vehicle Testing**
Description: Full fiber and Cat6 structured cabling, Avaya Call center Installation, Time attendance system, VPN connectivity between branches and HQ, wireless system,...

Some completed projects:

- ▶ **DFS ME**
Description: As Air Charter, Cargo Charter and Workforce Transportation Charter Services company we have done: Fully Structured Cabling, Networking , Avaya Telephone system installation for all 4 branches.
- ▶ **Bait al Yazı Building contracting -0)**
Description: As one of the well-known building contractors in UAE we have completed more than 20 projects as low current system.
- ▶ **Al Amar Engg.**
Construction As one of the oldest Construction companies in UAE (1960) we have many completed and under process projects.
- ▶ **Sigma Factory**
Description: As part of Issam Kabbani Group we completed Structured Cabling approximately 900 points , Wireless System for the new Factory at DIC (Dubai Industrial City).
- ▶ **Cocoona Center for Aesthetic Transformation**
Description: Xcally Asterisk Multi Cahnnel Call Center Supply and installation for HQ and 2 Branches.
- ▶ **Afrina Beauty Center and Sweet Shop**
Description: 7 Barnches Interconnect with Head office with centerlized Call Center and Hotspot Solution.
